

Code N° 5010 KIT SWIMMING POOLS (ECONOMICAL)

SENSITIVITY: 0,2 pH units / 0,1 ppm Cl₂

TEST QUANTITY: 120 / 60

KIT CONTAINS:

- 1 bottle 15cc reagent Total chlorine
- 1 bottle 15cc reagent pH 6,5-8,5
- 1 test tube 10cc
- 1 double color scale with use directions

NOTES:

- The reagent Total chlorine contains a quantity of o-tolidin below the limit considered dangerous by the regulation 67/548 CEE
- Normally swimming pools contain organic substances which can react with chlorine to form chloramine. Therefore it is advisable to control free chlorine, combined chlorine and total chlorine using the kit 1011 IPT CHLORINE DPD.
- No spare parts available
