

Code N° 1012 IPT CHLORIDE (titration with mercury nitrate)

SENSITIVITY: 0,5 french degrees (on 10 ml)

TEST QUANTITY: 625 french degrees

KIT CONTAINS:

- 1 bottle 25cc titrant chloride
- 1 bottle 15cc reagent chloride A
- 1 bottle 15cc reagent chloride B
- 1 test tube 20cc
- use directions

NOTES:

- As the titration has a threshold of about 2 ppm, for low chloride concentrations we recommend the colorimetric method (our IPT N. 1031)
- For higher precision we recommend the HYDROCHECK kits.

SPARE PARTS:

- | | |
|--|--------------|
| • titrant chloride, 6 bottles 25cc | Code N° 3109 |
| • titrant chloride 1 °f, 6 bottles 250cc | Code N° 3110 |
| • reagent chloride A, 6 bottles 15cc | Code N° 3001 |
| • reagent chloride B, 6 bottles 15cc | Code N° 3203 |
| • test tube 20cc, 10 | Code N° 3310 |
