NOTES:

The SPECTRATEST kits must be used with a spectrophotometer with a 16-mm-round cell-holder.

It is advisable to use a spectrophotometer as the HC 7800 or Uvi-Line, because we provide them with preloaded factors and they do not require the preparation of a calibration curve.

The SPECTRATEST kits, which offer a much lower cost per analysis, are recommended when performing many analysis to be repeated frequently.

The MONOTEST kits significantly simplify the analysis in laboratory. They offer high precision and reliability, they are easy and safe to use. All kits contain 20 test tubes with pre-measured reagent.
