

6611 HYDROCHECK MONOTEST IRON HIGH

RANGE: 0,1 - 5 ppm Fe

NUMBER OF TEST: 20

KIT CONTAINS:

- 20 test tubes with pre-measured reagent
- 1 test tube for blanc
- 20 stickers for tube
- instructions

NOTES:

The MONOTEST kits significantly simplify the analysis in laboratory. They offer high precision and reliability, they are easy and safe to use.

All kits contain 20 test tubes with pre-measured reagent.

They must be used with a spectrophotometer with a 16-mm-round cell-holder.

It is advisable to use a spectrophotometer as the HC 7800 or Uvi-Line, because we provide them with preloaded factors and they do not require the preparation of a calibration curve.

The SPECTRATEST kits, which offer a much lower cost per analysis, are recommended when performing many analysis to be repeated frequently.
